RETRACTION NOTE TO "DEVELOPMENT OF METHOD TO ASSESS SEPARATION PROCESS TAKING INTO ACCOUNT RHEOLOGICAL PROPERTIES OF MINERAL SLURRY"

Abstract

This article has been retracted at the request of the Editor-in-Chief, in line with journal Publication Ethics based on guidelines and standards developed by the Committee on Publication Ethics (COPE).

This article has been retracted at the request of the authors, because they determined mistakes in conducted research which demand additional check and clarification. Therefore, the results and conclusions could be incorrect. Both authors, Vadim Potemkin and Tatiana Aleksandrova, agree to this retraction.

The Authors and Editors would like to apologize to readers for not uncovering these issues during the editorial process.
